

How to build your Saintcon 2019 badge

Note: Steps 1-3 have been completed for you. These steps are just for reference.

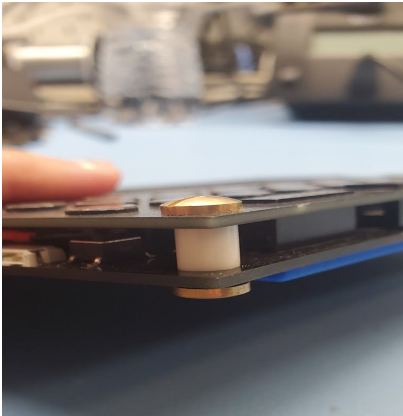

1. Insert Screws without slot through bottom board, then spacers.

2. Place top board and be **careful while connecting** both boards together.

3. Put slotted screws through top board. Be careful not to overtighten the screws!

4. Place the connectors Solder minibadge connector **WITH NOTCH FACING BOTTOM OF BOARD (This matters!)** and then solder on both female plugboard connectors.

5. Your board is now assembled! Take it to the nearest flashing station to get the latest code.
